DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to exposure control, classified in class 348, subclass 221.1.
- II. Claims 4-16, drawn to an intermittently flashing electronic strobe, classified in class 348, subclass 371.

Inventions of Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions of Groups I and II have separate utilities such as:

Group I does not require an electronic flash that emits light intermittently, as required by Group II, in order to change the cycle of the imaging device.

Group II does not require the changing of the cycle of the imaging device or the live display of an image, as required by Group I, in order to intermittently light the electronic flash.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement by traversed (37 CFR 1.143).
